Call for Papers: 11th Workshop on Programming Languages and Operating Systems (PLOS 2021)

An Online Workshop
http://plos-workshop.org/2021/

Important Dates

Paper submission deadline: August 6, 2021
Notification of acceptance: September 3, 2021
Final papers due: September 24, 2021
Workshop: October 25, 2021

Overview

Historically, operating system development and programming language development went hand-in-hand. Challenges in one area were often approached using ideas or techniques developed in the other, and advances in one area enabled new capabilities in the other. Today, although the systems community at large retains an iron grip on C, modern programming language ideas continue to spark innovations in OS design and construction. Conversely, the systems field continues to provide a wealth of challenging problems and practical results that should lead to advances in programming languages, software designs, and idioms.

This workshop will bring together researchers and developers from the programming language and operating system domains to discuss recent work at the intersection of these fields. It will be a platform for discussing new visions, challenges, experiences, problems, and solutions arising from the application of advanced programming and software engineering concepts to operating systems construction, and vice versa.

Suggested paper topics include, but are not restricted to:

- critical evaluations of new programming language ideas in support of OS construction
- domain-specific languages for operating systems
- type-safe languages for operating systems
- the design of language-specific unikernels
- language-based approaches to crosscutting system concerns, such as security and run-time performance
- language support for system verification, testing, and debugging
- synthesis of OS code
- static/dynamic configuration of operating systems
- static/dynamic specialization within operating systems
- the use of OS abstractions and techniques in language runtimes
- experience reports on applying new language techniques in commercial OS settings

Agenda

The workshop will be a highly interactive event with an agenda designed to promote focused and lively discussions. Part of the workshop program will be based on paper presentations. PLOS welcomes research, experience, and position papers; papers describing industrial experience are particularly encouraged. The set of accepted papers will be made available to registered attendees in advance of the workshop. Participants should come to the workshop prepared with questions and comments.

Submission Guidelines

All papers must be written in English and should be formatted in the two-column ACM article style (http://www.sigplan.org/Resources/Author/, using the options sigplan,10pt). The CCS Concepts, Keywords, and ACM Reference Format sections are not required in submissions. Submissions are single blind: author names and affiliations should be included.

Submissions must not be more than six (6) pages in length, using 10-point font. The bibliography does not count towards the page limit. The page limit will be strictly enforced, and shorter papers are encouraged. Papers must be submitted in PDF format via the workshop website. They will be reviewed by the workshop program committee and designated external reviewers. Papers will be evaluated based on technical quality, originality, relevance, and presentation.

By default, accepted papers will be published electronically in the ACM Digital Library. The authors of accepted papers to be included in the ACM Digital Library will be required to sign ACM copyright release forms. The publication of a paper in the PLOS workshop proceedings is not intended to replace future conference publication.

Program Committee

Anton Burtsev, University of California, Irvine
Pierre-Évariste Dagand, Université de Paris (chair)
Michael Homer, Victoria University of Wellington
Faria Kalim, Apple Inc
Jeehoon Kang, KAIST
Antoine Kaufmann, MPI for Software Systems
Hui Lu, SUNY Binghamton
Gustavo Petri, Arm Research
Clément Pit-Claudel, Massachusetts Institute of Technology
Linhai Song, Pennsylvania State University
Alain Tchana, École Normale Supérieure de Lyon
Chia-Che Tsai, Texas A&M University
Carsten Weinhold, Barkhausen Institute

Organizing Committee

Antonio Barbalace, The University of Edinburgh
Eric Eide, University of Utah
Pierre Olivier, The University of Manchester
Olaf Spinczyk, Osnabrück University
